With Ruby's Sun in Aquarius you may find that she is quite a 'free thinker' with the tendency to fight for what is right... not only for herself but for others due to her idealist nature. As an adult she is likely to work or have involvement in one or more of the following fields: foreign affairs, travel industry, legal affairs and/or spirituality.

Your daughter's Moon in Aries suggests that the need to come first is very strong for her. The qualities of courage, leadership, emotional honesty and looking out for the underdog are also prominent! These qualities are most likely to have been inherited from the mother or mother figure.

With Aries Rising the first impression your daughter makes on others will be as an impulsive, uncomplicated and fiery individual. As she matures she will learn to control and direct these qualities in a way that will inspire others and develop her leadership skills. Ruby will be gifted in being able to see into the soul of others.
