

ALUMINIUM SECTION

500 SERIES FIXED WINDOW

DESCRIPTION:

A medium-duty aluminium extrusion for fixed windows. This window is sealed with Sikaflex, a polyurethane sealant with superior strength and adhesion for glazing applications. This enables replacement of glass without the need to remove the frame from the boat. A rubber cover strip covers the fixings for a much cleaner finish. An internal fixing trim can be supplied if required to enable quick and attractive finishing if the inside of the cutout. The trim comes predrilled for fixings. The same rubber cover strip is used to cover the base of the screws.

APPLICATIONS:

This window is designed for small - medium sized sea going craft that require moderate strength and durable maintenance free operation.

DIMENSIONING:

All dimensioning and radii are measured at the cutout or shoulder point.

STANDARD RADIUS:

51 and 75 mm

SHAPE:

Any shape to template having straight edges and radiused or mitred and welded corners.

FINISH:

20 micron natural anodise or colours available on request.

GLAZING:

5 or 6 mm toughened safety glass in clear, grey or green. Acrylic and polycarbonate glazing also available,

FIXING:

Frames come predrilled, 5/32" countersunk as standard, other drilling can be arranged on request.
