

ALUMINIUM SECTION

T5836 - 500 SERIES SLIDING WINDOW

DESCRIPTION:

A light-duty aluminium extrusion for sliding. It can be either single or double sliding. A rubber cover strip covers the fixings for a much cleaner finish. An internal fixing trim can be supplied if required to enable quick and attractive finishing of the inside of the cutout. The trim comes predrilled for fixings. A rubber cover strip is used to cover the base of the screws.

APPLICATIONS:

This window is designed for light - medium sized craft that require average strength and durable operation.

DIMENSIONING:

All dimensioning and radii are measured at the cutout or shoulder point.

STANDARD RADIUS:

51 mm.

SHAPE:

Any shape to template having straight edges and radiused or mitred and welded corners.

FINISH:

20 micron natural anodise or colours available on request.

GLAZING:

5 and 6 mm toughened safety glass in clear, grey or green tint. Acrylic and polycarbonate glazing also available,

FIXING

Frames come predrilled, 5/32" countersunk as standard, other drilling can be arranged on request.
