

ALUMINIUM SECTION

1000 SERIES FIXED WINDOW

DESCRIPTION:

A heavy-duty aluminium extrusion for fixed windows. This window is sealed with Sikaflex, a polyurethane sealant with superior strength and adhesion for glazing applications. This enables easy replacement of glass without the need to remove the frame from the boat. An easily fitted PVC cover strip covers the fixings for a much cleaner finish. An internal fixing trim can be supplied if required to enable quick and attractive finishing if the inside of the cutout. The trim comes predrilled for fixings. The same PVC cover strip is used to cover the base of the screws.

APPLICATIONS:

This window is designed for larger sea going craft that require considerable strength and durable maintenance free operation.

DIMENSIONING:

All dimensioning and radii are measured at the cutout or shoulder point.

STANDARD RADIUS:

100 mm.

SHAPE:

Any shape to template having straight edges and radiused or mitred and welded corners.

FINISH:

20 micron natural anodise or colours available on request.

GLAZING:

6, 8, 10 or 12 mm toughened safety glass in clear, grey or green (8 mm only available in clear). Acrylic and polycarbonate glazing also available,

FIXING:

Frames come predrilled, 3/16" countersunk as standard, other drilling can be arranged on request.
